EDUCATION

Malwa Institute of Science & Technology

Bachelor of Technology
(Undergraduate Student)
(2022-2026)

SUMMARY

I'm a full-stack Java developer with expertise in both front-end and back-end technologies. I have strong skills in Java, along with knowledge of JavaScript, HTML, and C, allowing me to build and maintain dynamic web applications and contribute to various stages of software development. My diverse skill set enables me to create efficient, user-friendly solutions.

WORK EXPERIENCE

Academic Projects :

Library Management :

Developed a Library Management System using Java, enabling efficient tracking of books, members, and transactions. The project features a user-friendly interface and supports functionalities like book search, borrowing, and returns, enhancing the overall library experience.

Website :

Created a web application using React that serves as a centralized platform for college students, allowing easy access to various educational resources and websites. The site enhances user experience by streamlining navigation and providing a cohesive interface for students to find and utilize essential tools.

SKILLS

web Design.

Frontend Coding.

Problem Solving.

Strong Communication.

Full-stack Java Developer.

Knowledge of HTML,JS,REACT.
